

Visitor and Contractor Management

Seamlessly move people through buildings with a unified platform that connects visitors and contractors to facilities

Visitor Management

Move people with purpose

- Streamlined entry with mobile pre-registration, customisable entry paths, onsite badge registration, and real-time occupancy dashboards.
- Seamless, frictionless check-in for visitors. Effortless management for your team.

Features

- ✓ Configurable check-in flows
- ✓ Manage Visitor Entry
- ✓ Real time notifications
- ✓ Geofence auto check-in and check-out
- ✓ Roll Call
- ✓ Invitation and pre-registration

Contractor Management

Compliance that flows seamlessly

- Centralised, secure compliance with real-time dashboards and intelligent tagging.
- Live easy access to compliance status: insurance, licenses, certifications, and safety checks.
- Automatic compliance management checks to prevent unauthorised access and keep approvals current.
- End to end compliance history by syncing Visitor and Contractor Management for a complete access record.

Features

- ✓ Geofence auto check-in and check-out
- ✓ Configurable Compliance Management
- ✓ Version Control document management
- ✓ Digital Permits, for contractors
- ✓ Inductions and training
- ✓ Automated Vendor Management

Our Solutions

Visitor Management

- Reduce bottlenecks with real-time site visibility.
- Fast-track visitors with mobile-friendly pre-registration.
- Customise entry flows for every visitor type.

Contractor Management

- Send automated inductions, direct to contractors' devices.
- Manage and issue permits across multiple sites in real time.
- Keep all your vendor records up-to-date, and in one place.

Compliance Management

- Enhance security with automatic compliance checks.
- Use role-based permissions to quickly distribute approvals.
- Streamline safety compliance with digital pre-screening.

Safety and Security

- Unlock precise security with multi-layered access paths.
- Pre-screen site guests for frictionless entry.
- Simplify multi-site management with a unified permit dashboard.

Reporting & Analytics

- Track check-ins and vendor compliance status for full auditability.
- Quickly export check-in data to the relevant teams.
- Easily sync everything with existing third party tools.

User Experience

- Web check-in creates a simple, frictionless guest experience.
- Drag-and-drop form builders keep compliance up-to-date.
- Deploy a solution with around the clock support.

Small

Core visitor management for teams that need a clean, compliant front-desk experience

KEY FEATURES

- ✓ **Self-serve check-in kiosks**
 A clean, accessible, low-friction arrival experience using the SinePoint Pro app
- ✓ **Digital invitations & FastTrack QR's**
 Invitations that let visitors scan and go, speeding up entry in seconds
- ✓ **Host notifications via various methods**
 Get push notifications in the Sine Pro mobile app to manage guests on the move
- ✓ **Pocket-ready roll calls**
 See exactly who's on-site, and take a headcount from the Sine Pro mobile app
- ✓ **Geofence auto check-in and out**
 Tailor compliance requirements for different visitor types and enforce them every time

Medium

Operational control & identity for organisations managing scale, security, and daily operations

Everything in Small plus:

KEY FEATURES

- ✓ **FastTrack pre-registration**
 Let your visitors complete details ahead of time for near-instant arrival
- ✓ **Asset register & issuance**
 Assign equipment at the front desk and track exactly what leaves the site
- ✓ **Native EntraID sync**
 Automatically keep your host lists up to date with EntraID
- ✓ **Single Sign-on with SAML**
- ✓ **Outlook invitation add-in**

Large

Enterprise grade security & integrations for highly complex operating environments

Everything in Medium plus:

KEY FEATURES

- ✓ **Public API**
 Pull visitor data, manage sites and hosts, and create invites from your own systems
- ✓ **Real-time visitor screening**
 Automatically check guests against 3rd party screening through Family watchdog

Access control

Paid add-on

- ✓ **Assign and provision physical access cards through Sine**
- ✓ **Securely link on-premise servers to the cloud with SecureBridge**

Enterprise

Preferred pricing for those with a large portfolio of sites and advanced requirements.

Everything in Large plus:

- ✓ Tailored packaging for organizations onboarding 20 or more buildings

Sine Workflows

Digitize and streamline your processes. Requires a Core plan.

Add-on

Implementation

Your Quick Start onboarding Roadmap

STAGE 1.

Onboard and Prepare

- You'll receive a welcome email from your Implementation team outlining what to expect.
- We collect the information we need to configure your system (configuration details, user lists, site specifics).

STAGE 2.

Build, Plan, and Readiness

- We create a tailored implementation plan and timeline based on your content.
- We confirm everything is ready to proceed and lock in the schedule for the next steps.

STAGE 3.

Training, Go-Live, and Support

- Our Implementation Specialist guides you through setup and trains your team for a smooth go-live.
- Ongoing support available to help with tips, optimisations, and updates.

Around the clock Support

Access real support anytime you need it.

Expert assistance available via chat, call, or your dashboard. We don't employ bots. Just knowledgeable people ready to resolve issues, guide your setup, and keep your operations running smoothly.
