

Multi-Site Mastery in Education

Empowering Schools and Universities to Welcome Every Visitor and Contractor with Confidence

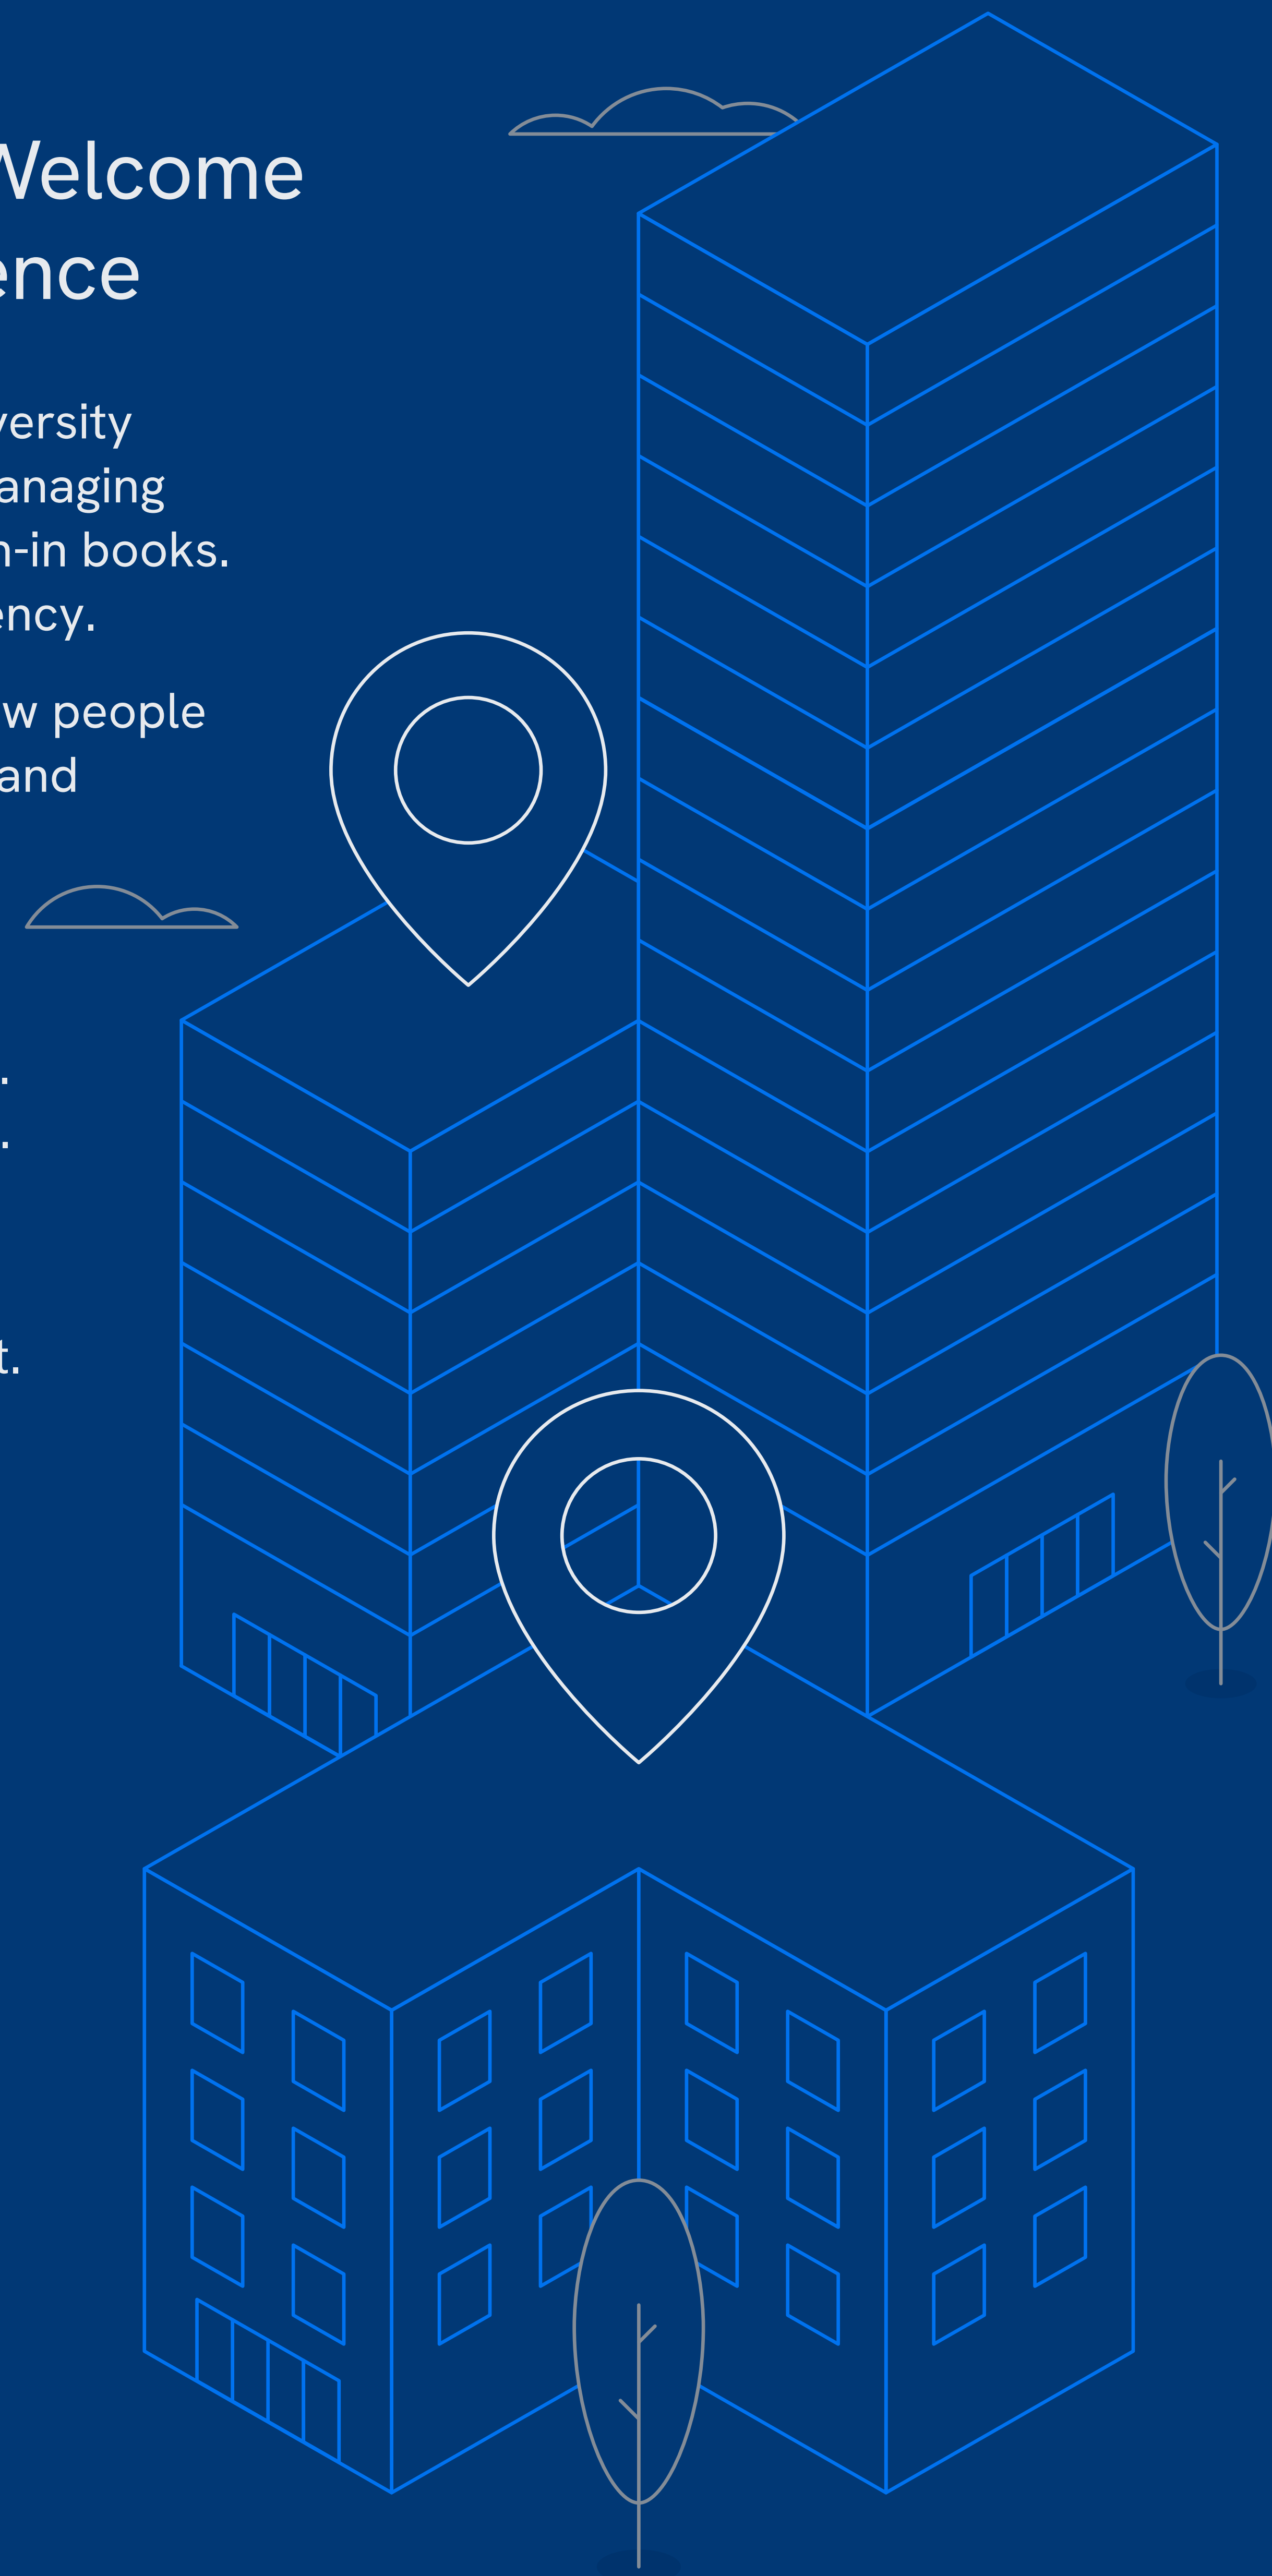

Whether you manage a small network of schools or a sprawling university campus portfolio, every new building multiplies the complexity of managing visitors, contractors, and compliance. More access points. More sign-in books. More back-ground checks. More people to account for in an emergency.

Yet the schools and universities leading the way are transforming how people move through their buildings — replacing complexity with harmony and making every site safer, more compliant, and more efficiently run.

Every Building. Different People. One Standard.

Your buildings are filled with people who make your institution great. Prospective families. Guest lecturers. Research partners. Governors. Open day crowds. Maintenance teams. Construction crews. IT specialists. Cleaners. Sparkies and plumbers. Grounds crews.

Every one of them deserves a process that's welcoming and efficient. And every one of them needs to be accounted for — because your duty of care never takes a day off.

FROM COMPLEXITY TO HARMONY

Duty of Care

every contractor verified, every visitor accounted for, every child and young person protected at every site.

Effortless Compliance

Working With Children Checks, insurance, and inductions tracked automatically across every school and campus.

Emergency Readiness

Knowing who has checked-in and when.

Outstanding First Impressions

A modern, custom-branded welcome that reflects your institution wherever visitors arrive.

Network-Wide Visibility

Real-time insight across every site replacing guesswork with intelligence.

SIX PILLARS THAT MAKE IT POSSIBLE

Visitor Management

Warm, digital-first sign-in with pre-registration, identity verification, host notification, and badge printing at every site.

Contractor Management

Full lifecycle control from onboarding and credentialling through induction, permitting and ongoing compliance across your network.

Compliance Management

Automated credential verification, expiry alerts, compliance gating, and audit-ready documentation embedded in every workflow.

Reporting & Analytics

Portfolio-wide dashboards, site benchmarking, and trend analysis.

Safety & Security

Seeing who checked in and when, emergency mustering, watchlist screening, and zone-based access control across every building.

User Experience

Intuitive for staff, self-service for visitors, mobile-first for contractors, high adoption from day one.

The Result

Every school and campus connected. Every visitor welcomed. Every contractor compliant. Every building safer. Every child protected. Every decision backed by data.

About Sine By Honeywell

Sine transforms how people move through buildings. From visitor check-ins to contractor onboarding and ongoing compliance, we smooth out the complexity so your facility stays safe, compliant and efficient. The result? Your building operates like the sophisticated system it is, with humans as part of the harmony, not the chaos.
